

## Advance warning LED lamps

Advance warning lamps used primarily for highlighting traffic signs, signs on highway information boards or the back of the maintenance vehicles.

- > **1 to 3 advance warning LED lamps** ø300mm **EN 12352 L9H**
- > lamps flashing in **synchronous** or **asynchronous mode**
- > electronics automatically reduce luminous intensity at night
- > moreover, the electronics include reverse polarity protection and protect the battery from deep discharge
- > **5m power supply cable with battery terminals**, 3m length between each lamp
- > the lamps can be attached by M8 screws (horizontally in the axis 90mm from each other)

*Technical data in the chart refer to one warning lamp.*

### TECHNICAL DATA

Power supply	12/24V=
Current consumption 12V=	day 0,50A night 0,25A
Average consumption 12V=	9,0Ah / 24 hours
Current consumption 24V=	day 0,28A night 0,14A
Average consumption 24V=	5,1Ah / 24 hours
Flashing frequency	60/min.
Dimensions (WxHxL)	340x340x210mm
Weight	2,5kg

**DUE TO THEIR HIGH LUMINOUS INTENSITY, THESE LAMPS ARE USED PRIMARILY ON HIGHWAYS**
