

Base for DZ+SS with wheels

Portable base (stand) can be used as stable holder of portable traffic signs or signalling light devices.

- > hot-dip galvanized steel construction with wheels
- > for enhanced safety, thinned construction at the bottom of the vertical poles (controlled bending in a crash)
- > one or two poles of 40x40mm can be placed
- > the particular number of HIT bases provide the stability of the base
- > thanks to the wheels, the bases can be moved over short distances without the necessity to dismount the traffic signs or the traffic device

TECHNICAL DATA

Dimensions (WxHxL)	500x400x1840mm
Weight	30kg

PODSTAVEC JE SCHVÁLEN MD ČR
PRO POUŽITÍ NA KOMUNIKACÍCH
