

Our LED lamp L8H

Clearly best signalling LED lamp in its category!

Increased power efficiency:

6 times lower energy consumption as compared to halogen lamp with 20W light bulb

More economical:

Much longer lifetime without need to replace the light bulbs

More reliable:

Enhanced resistance to temperature fluctuations and vibrations

Safer:

No risk of the bulb glass breaking or getting burnt from the warmth

Innovative:

Specially designed optics with high optical efficiency and new LED technology

The lamp complies with the **EN 12352 standard, category L8H.**

The lamp can be used on highways, expressways and other road categories.

Products with the new HIT-LEDIX-200 lamps powered by battery keep flashing up to 6 times longer than products supplied by halogen lamps. This means significantly lower maintenance, operating and battery replacement costs!

HIT-LEDIX-200 specifications:

| | |
|---------------------|------------------|
| Supply voltage | 12/24V= |
| Number of LED | 3 |
| Current consumption | continuous light |
| | 12V= 250mA |
| | 24V= 80mA |
| Dimensions (øxD) | 205x140mm |
| Weight | 530g |
