

The company

HIT HOFMAN is a prominent production and sales company specialized in traffic warning light systems, traffic signs, traffic safety devices and safety systems used on roads and highways to enhance safety of traffic.

Our company opened in 1990 as one of the first manufacturers of warning lights in the Czech Republic. In 1998, the company moved into its own facilities and later, an extra production hall and a storehouse were built.

Since its foundation, our company has achieved a reputation as a reliable and reputable partner in the area of road traffic safety. We supply high-quality, safe and innovative products to all over Europe.

Our products are designed to protect workers at road construction and maintenance sites as well as the police and fire brigade who work in the traffic. Other products are used to warn road users of dangerous zones and providing necessary information on construction areas, closures or accidents.

Our success is based on the excellent quality of all products that are produced and tested according to national as well as international standards and in close cooperation with the best testing bodies, the Czech Ministry of Transport and Road and Motorway Directorate of the Czech Republic.

You can find the list of our products including the regularly updated news on our web page www.hit-hofman.eu.

HIT HOFMAN is your reliable partner for road safety!
